

Shivank Rastogi

Database Developer | Python & Web Development | 3+ Years of Experience

Indirapuram, Ghaziabad

Phone: +91-7451-888-881 | Email: Shivank01@gmail.com

Professional Summary

Results-oriented Database & Full Stack Developer with 3+ years of experience in MySQL, SQL Server, Python, ETL, and web application development. Experienced in designing high-performance databases, developing stored procedures, triggers, views, and ETL pipelines, while also building responsive web applications using Python (Flask), HTML5, CSS3, and JavaScript. Skilled in query optimization, data migration, Role-Based Access Control (RBAC), REST API integration, dashboard development, and automation. Passionate about developing scalable, secure, and user-friendly applications that combine robust backend systems with modern frontend interfaces.

Professional Experience

Database Developer – Virtto Technologies Pvt. Ltd. (Apr 2025 – Present)

Project 1: Project Progress Monitoring Portal (PPM Portal)

Clients: Adani Realty & NMDPL

Environment: MySQL, Python, Flask, HTML5, CSS3, JavaScript, ETL, AI Analytics

- Developed a centralized PPM Portal for real-time tracking of construction progress, milestones, approvals, and resource allocation.
- Designed optimized MySQL schemas for project hierarchies and approval workflows.
- Built stored procedures, triggers, views, functions, KPIs, dashboards, and automated notifications.
- Created ETL pipelines and staging tables for seamless data migration.
- Optimized SQL queries and indexing for high-performance dashboards.
- Implemented Role-Based Access Control (RBAC).
- Developed responsive web pages using HTML5, CSS3, JavaScript, and Flask templates.
- Assisted in backend API integration using Python (Flask).
- Built reporting dashboards and monitoring modules.

Project 2: ShipShopy – Logistics & Delivery Management System

Client: ShipShopy Private Limited

Environment: MySQL, Python, Flask, HTML5, CSS3, JavaScript, ETL

- Designed normalized MySQL schemas for logistics, warehouse, courier, and order management.
- Built stored procedures, triggers, views, and operational reports.
- Developed ETL jobs and migration scripts.
- Worked on frontend screens using HTML5, CSS3, and JavaScript.
- Assisted in backend development using Python Flask.

- Generated KPI dashboards and operational reports.
- Implemented RBAC, audit logs, and archival framework.

Tools & Technologies:

MySQL | Python | Flask | HTML5 | CSS3 | JavaScript | ETL | Stored Procedures | Views | Triggers | Query Optimization | RBAC | Git

Database Developer – Pepfuels Technologies Pvt. Ltd. (Jan 2024 – Mar 2025)

Project 1: RIMS (Retail Management Software)

Environment: SQL Server 2014

- Developed SQL Server databases for billing, inventory, and customer analytics.
- Designed stored procedures and database models.
- Automated ETL workflows and reconciliation.
- Optimized indexing and SQL queries.

Project 2: DVS (Data Validation System)

Environment: SQL Server 2014

- Built a data validation framework for internal databases.
- Designed audit tables and triggers.
- Automated discrepancy reports and validation workflows.
- Improved performance through SQL query optimization.

Tools & Technologies:

SQL Server | T-SQL | ETL | Stored Procedures | Query Optimization

Customer Data & MDM Specialist (SQL & Order Management) – Signify Innovations India Ltd. (Dec 2021 – Dec 2023)

- Worked in the MDM team to maintain and validate customer, material, and pricing master data.
- Automated manual processes using SQL and WinShuttle.
- Developed SQL queries and stored procedures.
- Built reporting and data migration workflows.
- Generated MIS reports using SQL and Power BI.
- Collaborated with Sales, Logistics, and Finance teams.
- Supported order management and data governance.

Technical Skills

Backend: Python (Basic), Flask (Basic), REST API (Basic)

Frontend: HTML5, CSS3, JavaScript (Basic), Responsive Web Design

Database: MySQL, SQL Server, T-SQL, Stored Procedures, Views, Triggers, Functions, Query Optimization, Indexing

Data Engineering: ETL, Data Migration, Data Validation, Audit Logging, Database Design, Performance Tuning

Reporting & Analytics: Power BI, Dashboard Development, MIS Reporting, AI Analytics

Version Control: Git (Basic)

Education

- MBA (Operations Management, PGDM) – IMT-CDL Ghaziabad – 2018
- BCA – CCS University – 2010
- 12th – U.P. Board – 2007
- 10th – U.P. Board – 2005
